

TRANTEX MODEL 360SPS SPRAY THERMOPLASTIC APPLICATOR

The **360SPS Thermoplastic Applicator** uses a unique, non-pressure thermoplastic spray system, delivering the maneuverability of a walk behind applicator and an economical alternative to large trucks with air-pressurized tanks. A LP fired 5.5 HP Engine powers a self contained hydrostatic propulsion system with infinite speed control in forward or reverse up to 4 mph.

An optional operator ride-on sulky can be easily attached to the 360SPS, which alleviates operator fatigue and will also increase LP fuel capacity, saving you time and money!

Self Propulsion System

- Hydrostatic drive allows infinite speeds, forward and reverse, up to 4 mph (7 kph)

Drive Engine

- 5.5 HP Propane fired, electric start Honda Engine

Thermoplastic Spray Box

- 4", 6", 8", or 12" widths available
- Spray thickness: 25 mils. (.6mm) - 125 mils. (3.0mm)

Variable Width Glass Bead System

- 4", 6", 8", 12", dual 4" & 6" bead widths with the turn of a dial - 50 lb. capacity
- Optional Double Drop Bead systems available

Material Tank

- 360 pound capacity
- Interchangeable for color changes

Automatic Agitation

- Continuous agitation of molten material

Automatic Thermostat

- Regulates material temperature

Compact Size

- Weight: 600lbs(272 kg)
- L: 54" (137 cm) W: 37" (94 cm) H: 52" (132 cm)

OPTIONAL EQUIPMENT

Operator Ride-On Sulky

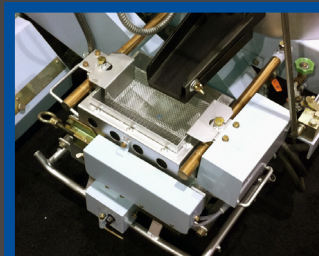

- Adjustable padded seat provides additional propane storage. Includes unique steering system that allows for straight steering or preset curve.

Extra Material Tank

- Lightweight material tank is easily removed for quick change of colors

Double Drop Glass Bead System

- For improved retro-reflectivity

The 360SPS Spray Boxes are available in 4", 6", 8" and 12" and are easily interchangeable.

Optional Double Drop Glass Bead System. One system for standard and large glass beads.
